

Submersible Sewage Pump for Wastewater Drainage

This submersible sewage pump is designed for wastewater drainage in factories and construction sites. It is also suitable for municipal sewage treatment plants and residential drainage stations.

Product Overview

Professional Wastewater Management

This high-performance submersible sewage pump is engineered for demanding drainage tasks in commercial, municipal, and industrial settings. Featuring a robust design with a copper-wound motor and stainless steel shaft, it reliably handles sewage and debris in challenging environments. The unit includes a built-in thermal protector for enhanced safety and longevity during continuous operation.

Operational Limits

Maximum Immersion Depth	5 m
Maximum Liquid Temperature	40 °C
Liquid pH Value	4-10
Maximum Liquid Density	0.0012 kg/m ³

Technical Features

Motor Specifications

- Copper winding
- Built-in thermal protector
- Stainless steel welded shaft

Insulation Class	F
------------------	---

Compliance

Certifications & Standards	CE, RoHS, CCC, ISO 9001, GS
----------------------------	-----------------------------

Applications

Typical Applications

- Factories and construction sites
- Commercial wastewater drainage
- Municipal sewage treatment plants
- Residential drainage stations
- Methane pools and field irrigation
