

Submersible Sewage Pump for Wastewater Drainage

This submersible sewage pump is designed for wastewater drainage in factories, construction sites, and commercial facilities. It is also suitable for drainage systems in municipal sewage treatment plants and residential quarters.

Product Overview

Professional Submersible Sewage Pump

This submersible sewage pump is engineered for heavy-duty wastewater drainage in industrial, commercial, and municipal environments. Featuring a robust motor with copper windings and a stainless steel welded shaft, it provides reliable performance in demanding fluid conditions. The design includes a built-in thermal protector and automatic float switch operation to ensure longevity and operational safety across various drainage applications.

Operating Limits

| | |
|------------------------|-------|
| Max Immersion Depth | 5 m |
| Max Liquid Temperature | 40 °C |
| Operating pH Range | 4-10 |

Motor Specifications

Motor Construction

- Copper winding
- Built-in thermal protector
- Stainless steel welded shaft

Insulation Class

F

Applications

| | |
|----------------------|--|
| Typical Applications | Factories, Construction Sites, Commercial Facilities, Municipal Sewage Plants, Residential Projects, Methane Pools, Field Irrigation |
|----------------------|--|

Certifications

| | |
|------------------------|-----------------------------|
| Standards & Compliance | CE, RoHS, GS, ISO 9001, CCC |
|------------------------|-----------------------------|
