

Submersible Sewage Pump for Wastewater Drainage

This submersible pump is designed for wastewater drainage in factories and construction sites. It is also suitable for drainage systems in municipal sewage treatment plants and residential quarters.

Product Overview

High-Performance Submersible Sewage Pump

This submersible sewage pump is engineered for heavy-duty wastewater management across industrial, municipal, and agricultural sectors. Designed for durability and efficiency, it features a stainless steel welded shaft and robust copper-wound motor with thermal protection. The unit is optimized for reliable operation in demanding environments, making it an ideal choice for sewage treatment, construction site drainage, and field irrigation.

Certifications & Standards

Compliance Badges

CE • RoHS • ISO 9001 • CCC • GS

Operational Limits

Max Immersion Depth	5 m
Max Liquid Temperature	40 °C
Liquid pH Value	4-10
Max Liquid Density	1200 kg/m ³

Motor Specifications

Key Motor Features

- Copper winding
- Built-in thermal protector
- Stainless steel welded shaft
- Insulation class F

Applications

Primary Applications	Wastewater drainage, Municipal sewage treatment, Construction sites, Residential drainage, Agricultural irrigation
