

Submersible Sewage Pump for Wastewater Drainage

This submersible sewage pump is designed for wastewater drainage in factories, construction sites, and commercial facilities. It is also suitable for drainage systems in municipal sewage treatment plants and residential quarters.

Overview

Professional Submersible Sewage Solution

This submersible sewage pump is engineered for efficient wastewater management in demanding industrial, commercial, and residential environments. Featuring a robust motor with copper windings and thermal protection, it delivers reliable performance in heavy-duty drainage applications. Designed to handle diverse liquid conditions, it offers a durable and versatile solution for municipal projects, construction sites, and agricultural irrigation.

Operating Limits

Max Immersion Depth	5 m
Max Liquid Temperature	40
Liquid pH Range	4-10
Max Liquid Density	0.0012 kg/m ³

Motor Specifications

Motor Features

- Copper winding
- Built-in thermal protector
- Stainless steel welded shaft

Insulation Class	F
------------------	---

Certifications

Regulatory Compliance

CE • CCC • ISO 9001 • GS • RoHS

Applications

Typical Applications	Municipal Sewage, Construction Sites, Factory Drainage, Residential Quarters, Field Irrigation
----------------------	--
