

Submersible Sewage Pump for Wastewater Handling

This submersible sewage pump is engineered for reliable performance in demanding environments. It is ideal for drainage, irrigation, and industrial applications where solids-laden fluids need to be transferred.

Product Overview

Industrial Wastewater Solutions

The QW series submersible sewage pump is a heavy-duty solution engineered specifically for high-efficiency wastewater and sewage handling. Designed for durability in demanding environments, these pumps feature robust construction and powerful motor capabilities to ensure consistent uptime. They serve as an ideal choice for drainage, irrigation, and complex industrial applications requiring the reliable transfer of solids-laden fluids.

Performance Specifications

Operational Duty

Heavy-duty • Submersible

Suitable Applications

Wastewater Handling, Sewage Systems, Drainage, Irrigation, Industrial Processing

Design Features

Key Design Attributes

- Robust housing for demanding environments
- High-performance motor design
- Solids-handling capability
- Versatile size configurations
