Product Overview

High-Efficiency Submersible Sewage Pumps

This range of submersible pumps is engineered for robust wastewater and sewage management in demanding environments. Featuring advanced open impeller designs, these units offer a semi-cutting action that effectively prevents clogging by clearing solids during operation. Built for reliability and safety, these pumps are suitable for various drainage applications and adhere to international safety standards.

Technical Specifications

Available Models

Model	Power	Max Flow	Max Head
V1300DF-8	0.37 kW (0.5 HP)	80 L/min	46 m
V1500/V1500F	1500 W	270 L/min	22 m
V2200/V2200F	2200 W	700 L/min	17 m

Electrical & Compliance

220-240V, 50Hz, Insulation Class B, CE Certified

Operational Performance

Performance Highlights

2860 RPM

Operational Speed

3 inches

Outlet Diameter

Design Features

Impeller Design

Open impeller with semi-cutting action for anti-clogging performance.
