

Submersible Sewage Pump with Float Switch

This submersible sewage pump is designed for efficient wastewater management. It is equipped with a float switch for automatic operation and delivers high flow rates.

Product Overview

Professional Wastewater Management

This robust submersible sewage pump is engineered for efficient wastewater management in residential, commercial, and industrial settings. Featuring durable construction and high-performance motor capabilities, it effectively handles solids and debris. The integrated float switch provides automatic operation for reliable performance across varying water levels, while its compact design ensures straightforward installation in space-constrained environments.

Technical Specifications

Operation Mode

Automatic • Submersible

Target Applications

- Residential Wastewater
- Commercial Sewage
- Industrial Wastewater Removal

Key Features

Float Switch, Solids Handling, Compact Design, Low Maintenance
