

Submersible Sewage Pump with Float Switch

This submersible sewage pump is designed for efficient and reliable wastewater management. It features a stainless steel motor housing and a durable cast iron pump body, ensuring longevity and resistance to corrosion.

Product Overview

Professional Submersible Sewage Pump

This robust submersible pump is engineered for efficient wastewater management, featuring a durable construction suitable for civil, industrial, and domestic applications. Equipped with a reliable float switch for automatic operation, it provides dependable service in demanding environments. The unit includes advanced motor protection and is designed to handle various fluid transfer needs with ease.

Operational Parameters

Maximum Fluid Temperature	35 C
Maximum Sand Content	0.25 %

Electrical Specifications

Input Voltage	220v-240v
Frequency	50 Hz

Technical Details

Compliance & Standards	ISO 9906, CE
Motor Configuration	Rewindable or full obturated screen motor

Applications

Recommended Use

- Water supply from wells or reservoirs
- Domestic sewage and drainage
- Civil and industrial applications
- Garden use and irrigation
