

Submersible Sewage Pump with Float Switch

This submersible sewage pump is designed for efficient wastewater removal. It features a float switch for automatic operation and is suitable for handling solids and debris.

Overview

Efficient Wastewater Management

This submersible sewage pump is engineered for reliable wastewater removal in residential, commercial, and industrial settings. Featuring a robust, corrosion-resistant construction and a powerful motor, it efficiently handles solids and debris. The integrated float switch ensures fully automatic operation, providing a cost-effective and low-maintenance solution for your fluid management needs.
