

Submersible Sewage Pump

This submersible sewage pump is designed for efficient wastewater management. With a durable construction and powerful motor, it effectively handles solids and debris in sewage applications.

Overview

Robust Wastewater Management

This submersible sewage pump is engineered for efficient wastewater handling in residential, commercial, and industrial settings. Built with durable, corrosion-resistant materials, it ensures reliable long-term performance even in demanding environments. The unit features an integrated automatic float switch for precise water level control and simplified installation.

Technical Specifications

Performance Ratings

750 W Power Output	1 HP Horsepower	13000 L/H Max Flow Rate	8 M Max Head
------------------------------	---------------------------	-----------------------------------	------------------------

Operating Limits

Parameter	Value
Max Depth	5 M
Max Particle Size	35 MM

Electrical Data

Power Requirements	220V-240V, 50Hz
--------------------	-----------------

Features

Key Capabilities

- Automatic float switch for level control
- Corrosion-resistant construction
- Handles solids and debris
- Suitable for residential and industrial use
