

# Submersible Stainless Steel Drainage Pump with Float Switch

This submersible drainage pump is designed for efficient water removal. Its stainless steel construction ensures durability, and it includes a float switch for automatic operation based on water level.

## Product Overview

### High-Efficiency Drainage Solution

This submersible drainage pump is engineered for robust performance in water removal tasks. Constructed with high-grade stainless steel, it offers excellent corrosion resistance and durability in demanding environments. An integrated float switch ensures reliable automatic operation, while the multi-stage hose adapter provides versatile installation options for cellars, pools, and flooded spaces.

## Technical Specifications

Housing Material	Stainless Steel
Operation Type	Automatic (via Float Switch)
Connection Type	Multi-stage hose adapter

## Applications

Suitable Environments	Cellars, Swimming Pools, Flooded Areas, General Drainage
