

Submersible Stainless Steel Drainage Pump

This submersible drainage pump is designed for efficient water removal in various applications. It is constructed with durable stainless steel, offering reliable performance and corrosion resistance.

Overview

Submersible Stainless Steel Drainage Pump

The QDB 250 is a high-performance submersible drainage pump engineered for efficient water removal in diverse environments. Built with durable stainless steel, this unit ensures exceptional corrosion resistance and reliable long-term operation. It features an integrated float switch for fully automatic water level control, making it an ideal solution for draining cellars, swimming pools, and construction sites.

Technical Specifications

Material

Stainless Steel

Model Number

QDB 250

Key Features

Suitable Applications

- Cellar drainage
- Swimming pool drainage
- Construction site water removal
- General water accumulation

Operation

Automatic (Float Switch)
