

Submersible Stainless Steel Water Pump

This submersible water pump is designed for efficient water extraction. Constructed from durable stainless steel, this multi-stage pump is suitable for various applications including irrigation, deep well pumping, and industrial water supply.

Product Overview

Professional Submersible Water Pump

This high-performance multi-stage submersible water pump is engineered for efficient fluid extraction in demanding environments. Constructed from premium-grade stainless steel, it ensures excellent corrosion resistance and long-term durability. Its slim, compact design makes it an ideal solution for installation in narrow boreholes, serving diverse agricultural, residential, and industrial applications.

Technical Specifications

Material Composition	Stainless Steel
Pump Type	Multi-stage Submersible

Key Features

Advantages	Corrosion Resistant, High-Performance Motor, Slim Design, Reliable Operation
------------	--

Application

Recommended Applications

- Agricultural Irrigation
- Deep Well Pumping
- Industrial Water Supply
- Residential Water Systems
