

Submersible Stainless Steel Water Pump

This submersible water pump is designed for drainage and irrigation applications. It features a stainless steel body and a float switch for automatic operation.

Overview

Professional Submersible Water Pump

This high-performance submersible pump is engineered for efficient drainage and irrigation tasks in residential or professional settings. Constructed with a durable stainless steel body, it ensures long-term resistance to corrosion and wear. It features a reliable float switch for fully automatic operation, making it ideal for maintaining dry environments in basements, ponds, and other water collection points.

Technical Specifications
