

Submersible Stainless Steel Well Pump

This submersible pump is constructed from stainless steel for durability. It is designed for efficient water extraction from wells in applications such as irrigation, domestic water supply, and industrial uses.

Overview

Submersible Stainless Steel Well Pump

This high-performance submersible well pump is precision-engineered for efficient water extraction in demanding environments. Constructed from durable stainless steel, it offers exceptional longevity and resistance to corrosion, making it suitable for irrigation, domestic water supply, and various industrial applications. Designed for reliability, this unit ensures consistent performance and a long service life even under continuous operation.

Technical Specifications

Pump Size	8 inch
Material	Stainless Steel

Application

Typical Applications

- Irrigation
- Domestic Water Supply
- Industrial Water Extraction

Performance

Key Performance Indicators
