

Submersible Sump Pump for Water Removal

This submersible sump pump is designed for efficient water removal. It features a durable thermoplastic construction, ensuring resistance to corrosion and wear.

Product Overview

High-Efficiency Submersible Sump Pump

This robust submersible sump pump is engineered for reliable water removal in residential and commercial settings. Constructed from durable thermoplastic, it offers excellent resistance against corrosion and wear for long-term service. Its compact design ensures a seamless fit in confined spaces, making it an ideal choice for basement drainage and pool maintenance.

Technical Specifications

Material	Durable Thermoplastic
Core Features	Corrosion Resistant, Wear Resistant, Compact Design

Application Details

Typical Applications

- Basement drainage
- Pool water removal
- Flood management
- Confined space pumping

Installation and Compatibility

Installation Requirements	Includes discharge adapter for standard plumbing fitting compatibility.
