

Submersible Sump Pump with Float Switch

This submersible sump pump is designed for efficient water removal in various applications. Featuring a durable construction, it includes a float switch for automatic operation and is suitable for draining basements and removing water from pools.

Product Overview

High-Efficiency Submersible Sump Pump

This submersible sump pump is engineered for reliable and efficient water removal across a variety of residential and commercial applications. Built with a durable green and black exterior, the unit is designed for long-term performance in demanding dewatering tasks. It features an integrated float switch that enables automatic operation, making it ideal for maintaining dry basements, clearing pools, or managing water levels in confined spaces.
