

Submersible Sump Pump with Float Switch

This submersible sump pump is designed for efficient water removal in residential and light commercial applications. It features a float switch for automatic operation and durable construction.

Product Overview

High-Efficiency Submersible Sump Pump

This submersible sump pump is expertly engineered for reliable water removal in both residential and light commercial environments. It features a robust, durable construction that ensures long-lasting performance even under demanding conditions. Equipped with an integrated float switch, the unit provides seamless automatic operation, making it ideal for basement drainage, pool maintenance, and general water transfer tasks.

Technical Specifications

Key Operational Features

- Automatic float switch operation
- Submersible design
- Engineered for quiet operation
- Easy installation

Applications

Primary Use Cases

Basement Drainage, Pool Emptying, General Water Transfer, Light Commercial Use
