

Submersible Sump Pump

This submersible sump pump is designed for efficient water removal in various applications. The pump features a durable housing and automatic float switch and is suitable for draining basements, sumps, and other areas prone to water accumulation.

Product Overview

Professional Submersible Sump Pump

This high-performance submersible sump pump is expertly engineered for efficient water removal in residential and commercial settings. Featuring a durable, long-lasting housing and a powerful motor, it ensures dependable operation even in demanding environments. The integrated automatic float switch provides reliable, hands-free management of water levels in basements and sumps, while its quiet operation makes it ideal for consistent use.

Technical Specifications

Typical Applications

- Basement drainage
