

Submersible Utility Pump for Water Removal

This submersible utility pump is designed for efficient water removal. It features durable construction for reliable performance in demanding environments and is suitable for various applications, including draining flooded areas, emptying pools, and general water transfer.

Product Overview

Professional Submersible Utility Pump

This submersible utility pump is engineered for efficient water removal in a variety of demanding environments. With its robust motor and durable construction, it delivers high-volume pumping capacity for tasks such as draining flooded areas, pool maintenance, and general water transfer. Its compact and portable design, complete with an integrated handle, ensures reliable performance for both indoor and outdoor professional applications.

Key Features

Design Advantages

- Compact and portable housing
- Integrated carry handle
- High-volume motor
- Indoor and outdoor versatility

Suitable Applications

Flooded area drainage, Pool maintenance, General water transfer

Technical Specifications

Environment Compatibility

Indoor Use • Outdoor Use
