

Submersible Wastewater Drainage Pump

This submersible pump is designed for wastewater drainage in factories, construction sites, and commercial facilities. It is also suitable for drainage systems in municipal sewage treatment plants and residential quarters.

Product Overview

Robust Submersible Drainage Solution

This submersible wastewater drainage pump is engineered for durability, featuring a high-quality combination of stainless steel and reinforced thermoplastic materials. Designed for demanding environments, it provides high-volume water displacement with built-in thermal overload protection for enhanced motor longevity. Its versatile design makes it an ideal choice for basement dewatering, pool drainage, and various general water transfer applications.

Operating Limits

Max Immersion Depth	5 m
Max Liquid Temperature	40
Liquid PH Range	5-9

Key Features

Safety Systems

Thermal Overload Protection • Corrosion Resistant

Installation

- Versatile discharge adapter
- Accommodates different hose sizes
- Submersible design

Build Materials

Stainless Steel, Reinforced Thermoplastic
