Product Overview

High-Efficiency Submersible Drainage

This submersible drainage pump is engineered for efficient water removal across residential and professional environments. It features a robust, debris-filtering base and an integrated float switch for automated operation. Designed for durability and ease of use, it is the ideal solution for basements, construction sites, and flooded area management.

Technical Specifications

Max Immersion Depth

5 m

Immersion Depth

Max Liquid Temperature

40

Electrical Data

Power Supply

220-240V / 50Hz

Electrical Features

Single-phase, Capacitor integrated, Thermal overload protector

Safety & Operation

Operational Safety Protocols

- Always ensure the pump is fully submerged while in operation.
- Dry running is strictly prohibited.
- Ensure the pump is properly connected to earth ground.
- Avoid pulling the unit by the power cable.
- Allow the motor to cool down before extraction.
- Ensure power cables are properly sized to prevent voltage drop.

Features

Key Features

Float switch auto-operation • Protective strainer base • Compact design • Debris filtration
