

Submersible Water Pump - 100QJC4

This submersible pump is designed for efficient water extraction in various applications. Its robust construction ensures durability and reliable performance in demanding environments.

Product Overview

Versatile Submersible Solution

The 100QJC4 submersible pump is a high-performance solution designed for efficient water extraction in a variety of settings. Its robust construction makes it ideal for domestic, civil, and industrial applications, including irrigation and general water supply. Featuring a compact design, it is perfectly suited for easy installation in narrow wells and boreholes.

Operational Limits

Maximum Water Temperature

55

Max Temp

Minimum Well Diameter	102 mm
Maximum Immersion Depth	40 m

Applications

Suitable Use Cases	Domestic, Civil, Industrial, Garden, Irrigation
--------------------	---

Design Features

Key Features

- Compact design for narrow wells
- Integrated check valve to prevent backflow
- Multi-stage construction for high pressure
- Robust, durable build quality
