

Submersible Water Pump

This submersible water pump is designed for efficient water extraction. Constructed with stainless steel, it offers corrosion resistance and longevity.

Product Overview

Professional Submersible Water Pump

This high-performance submersible pump is engineered for reliable water extraction from deep wells and boreholes. Constructed from high-grade stainless steel, it provides exceptional corrosion resistance and a long operational lifespan in demanding environments. Designed for efficiency and ease of use, it incorporates advanced features like multi-stage pressure enhancement and an integrated check valve to ensure seamless water flow.

Technical Specifications

Material Composition	Stainless Steel
Built-in Check Valve	Yes
Design Type	Multi-stage

Applications

Recommended Usage

- Deep wells
- Boreholes
- Submerged sources

Primary Applications	Irrigation, Water Supply, Dewatering
