

# Submersible Water Pump

This submersible water pump is designed for efficient water removal in demanding applications. It is constructed with a stainless steel motor housing and a cast iron pump body for durability and long-lasting performance.

## Product Overview

### Professional Submersible Pumping Solution

The WQD-B series submersible pump is a reliable and robust solution designed for clean water management. Built with a high-durability stainless steel motor housing and a cast iron pump body, it offers excellent performance for domestic and industrial applications. It is engineered for continuous duty, making it highly effective for tasks such as irrigation, draining flooded basements, and general water removal.

## Performance Metrics

### Key Performance Metrics

**750 W**

Motor Power

**11 m**

Max Head

**276 L/min**

Max Flow Rate

## Technical Specifications

Power Supply	220V-50Hz
Rotation Speed	2860 r/min
Insulation Class	B

## Certifications & Quality

Compliance	CE
------------	----

## Construction

### Build Materials

- Stainless steel motor housing
- Cast iron pump body
