Product Overview

Professional Submersible Drainage Pump

The SP-750D is a high-performance submersible pump engineered for demanding water transfer and drainage applications. With a robust 750W motor, it efficiently handles large volumes of water, making it ideal for clearing flooded basements, pools, or construction sites. The integrated automatic float switch ensures hassle-free operation, while the durable construction guarantees reliable service in various environments.

Performance Metrics

Performance Highlights

750 W

Power Output

13000 L/H

Max Capacity

9 m

Max Head Height

Technical Specifications

Electrical Requirements

Parameter	Value
Voltage	220-240V
Insulation Class	Class B
Protection Rating	IPX8

Design & Convenience

Automatic Float Switch, Integrated Carry Handle, Compact Design, Versatile Outlet Adapter
