Product Overview

Professional Submersible Pumping Solutions

These high-performance submersible pumps are engineered for efficient water extraction from wells, boreholes, and submerged sources. Constructed with durable stainless steel, they offer exceptional corrosion resistance and a long service life for residential, commercial, and industrial applications. The systems are designed to international standards, supporting a wide range of power requirements and operating frequencies.

Technical Specifications

Power Range

0.37 kW

Minimum Power

110 kW

Maximum Power

Frequency Options

- 50 Hz
- 60 Hz

Available Pump Sizes

3 inch, 4 inch, 6 inch, 8 inch

Cooling Methods

Oil Cooling, Water Cooling

Compliance & Quality

Certifications

ISO 9001:2000 • CCC • CE • IEC-34-ICE • NEMA

Automatic Control Devices

Starter & Control Device Compatibility

Model	Voltage (V)	Power Range (kW)
M18-A	220	0.25-1.5
M18-B	220	0.25-2.2
M28-B	380	0.55-30
M68-11	380	0.25-15
