

Submersible Water Pump

This submersible pump is a robust solution for drainage and irrigation. It is constructed with stainless steel and cast iron for reliable performance in demanding environments.

Product Overview

Submersible Water Pump Solution

This robust submersible water pump is engineered for efficient water management in agricultural, residential, and industrial environments. Featuring a durable housing and a powerful motor, it is specifically designed to handle drainage and lifting tasks from wells or ponding areas. Integrated thermal overload protection and a debris-resistant strainer base ensure reliable, trouble-free operation even in demanding field conditions.

Operating Limits

Performance Limits

5 m

Max Operating Depth

40 °C

Max Fluid Temp

40 °C

Max Ambient Temp

Trans Medium pH Range

6.5-8.5

Structural Characteristics

Insulation Class

Class E

Protection Rating

IPX8

Application

Primary Applications

- Countryside well water lifting
- Farmland irrigation and drainage
- Construction site ponding drainage
- Industrial drainage
- Agricultural breeding applications
