

# Submersible Water Pump

This submersible pump is designed for efficient water extraction from wells and boreholes. It features durable stainless steel construction for corrosion resistance and long-lasting performance.

## ADDITIONAL IMAGES

## Product Overview

### Professional Submersible Pump

This high-performance submersible pump is engineered for efficient water extraction from deep wells and boreholes. Constructed with high-grade stainless steel, it offers exceptional durability and superior corrosion resistance. Its design incorporates advanced anti-sand technology to ensure consistent, reliable operation even in challenging submerged environments.

## Technical Specifications

Body Material	Stainless Steel
Outlet Type	Brass
Key Features	Anti-sand, Corrosion Resistant, Submersible, Durable

## Application

### Primary Applications

- Irrigation systems
- Deep well water supply
- Dewatering
- General water extraction
