

Submersible Water Pump - 4SD Series

This submersible water pump is engineered for efficient water extraction from wells and boreholes. Its compact design ensures easy installation for domestic, agricultural, and industrial use.

Overview

High-Efficiency Submersible Pump

The 4SD series submersible water pump is engineered for reliable water extraction from wells and boreholes. Designed for versatility, it is suitable for domestic, agricultural, and industrial applications, including irrigation and general water supply. Its compact construction ensures easy installation, while the high-efficiency motor delivers consistent water flow and minimizes energy consumption.

Technical Specifications

Power Rating

0.25 kW
Power Output

0.33 HP
Horsepower

Electrical Requirements

- Voltage: 220V
- Frequency: 50 Hz
- Speed: 2850 r/min

Performance & Compatibility

Operating Conditions

Parameter	Limit
Max Sand Content	150 g/m ³
Max Head	42 m

Applications

Suitable Applications

Well Pumping, River Pumping, Farm Irrigation, Water Supply, Domestic Use, Industrial Use
