

Submersible Water Pump

This submersible pump is designed for efficient water extraction in various applications. It features a durable stainless steel construction for longevity and corrosion resistance.

Overview

High-Performance Submersible Pump

The 4CN submersible pump is engineered for high-efficiency water extraction across diverse applications, including deep well pumping, irrigation, and industrial water supply. Constructed with durable stainless steel, this unit offers exceptional longevity and resistance to corrosion. It features a powerful motor and reliable internal components to ensure consistent, high-pressure operation for demanding professional environments.

Technical Specifications

Construction Material	Stainless Steel
Primary Applications	Deep Well Pumping, Irrigation, Industrial Water Supply

Performance Metrics

Performance Highlights

4 CN
Series Model

Features

Included Components

- Powerful Motor
- Control Box

Key Benefits

Corrosion Resistant • High Flow Rate • High Pressure • Reliable Operation
