

Submersible Water Pump for Domestic Use

This submersible pump is designed for efficient water removal in various applications. Its submersible design allows for operation directly within the water source, making it ideal for draining flooded areas, emptying pools, and general water transfer tasks.

Overview

Domestic Submersible Water Pump

This submersible water pump is engineered for efficient water removal and transfer in domestic and light commercial settings. Designed to operate directly within the water source, it handles both clean and slightly dirty water effectively. The unit features an integrated float switch for automatic operation, protecting the motor by preventing dry running.

Key Features

Safety & Protection

Float Switch • Anti-Dry Run Protection • Corrosion Resistant

Suitable Applications

Draining Flooded Areas, Emptying Pools, Water Transfer, Domestic Use, Light Commercial Use

Technical Specifications

Water Compatibility

- Clean water
- Slightly dirty water

Construction

Robust, corrosion-resistant materials
