Product Overview

Efficient Submersible Pumping Solution

This submersible water pump is engineered for reliable performance in drainage and irrigation applications. Constructed with durable, corrosion-resistant materials, it ensures longevity even in demanding environments. The unit features an integrated float switch for automatic operation and a screened base to effectively manage debris intake, making it an ideal choice for efficient water removal.

Operating Limits

Maximum Submersion Depth	5 m
Maximum Fluid Temperature	40
Max Suspended Solids	10 mm
Duty Cycle	Continuous duty

Technical Details

Cable Specifications

1 mm²

Cable Cross-Section

3 cores

Core Count

Cable Type	H07RN-F
------------	---------

Features

Key Features	Stainless Steel Construction, Automatic Float Switch, Screened Base, Corrosion Resistant, Quiet Operation
--------------	---

Applications

Suitable Applications

- Dewatering
- Irrigation
- General Water Pumping
- Drainage
