

Submersible Water Pump for Irrigation

This heavy-duty submersible water pump is designed for drainage and irrigation. It features robust construction for reliable performance in demanding environments and is suitable for agricultural, construction, and industrial use.

Product Overview

Professional Submersible Water Pump

This heavy-duty submersible water pump is expertly engineered for demanding agricultural, construction, and industrial environments. It provides reliable and efficient water transfer and is specifically designed to handle solids with ease. The robust construction ensures long-term performance even in the most challenging drainage and irrigation applications.

Technical Specifications

Key Performance Indicators

- Robust heavy-duty construction
- Solids handling capability
- Efficient water transfer design
- Submersible configuration

Design Type

Submersible • Heavy-Duty

Primary Applications

Agriculture, Construction, Industrial, Drainage, Irrigation
