

Submersible Water Pump V250F

The V250F is a compact and robust submersible pump designed for efficient water removal in various applications. It features a durable construction with corrosion-resistant materials for long-lasting performance.

Product Overview

Compact and Powerful Drainage Solution

The V250F is a robust submersible pump engineered for efficient water management in confined spaces. Built with high-quality, corrosion-resistant materials, it offers reliable performance for dewatering and general fluid transfer. The unit features an integrated float switch, enabling automatic operation based on real-time water levels.

Technical Specifications

Operational Mode	Yes
Key Features	Submersible, Corrosion-resistant, Automatic Float Switch, Compact Design

Applications

Typical Use Cases

- Drainage
- Dewatering
- General Water Transfer
