

Submersible Water Pump with Float Switch

This submersible pump is designed for efficient water removal in various applications. It features a float switch for automatic operation, starting and stopping based on water level.

Overview

Professional Water Management

The Q1CP-E1 submersible water pump is engineered for efficient and reliable water removal in diverse environments, including cellars and flooded areas. Equipped with an integrated float switch, the unit provides fully automatic operation by responding dynamically to rising water levels. Its robust, compact design ensures both longevity and ease of installation, while the inclusion of a universal hose adapter offers maximum compatibility for various professional drainage tasks.
