

# Submersible Water Pump with Float Switch

This submersible water pump is designed for efficient water removal in various applications. It features a float switch for automatic operation, starting and stopping based on water level.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Submersible Water Pump

This submersible water pump is engineered for efficient water removal and transfer in diverse environments. Featuring a robust construction and a powerful motor, it ensures reliable performance and long-lasting durability for professional use. The integrated float switch allows for automatic operation based on water levels, making it an ideal solution for draining flooded areas, emptying pools, and general irrigation tasks.

## Performance Metrics

### Key Performance Metrics

**150 g/m<sup>3</sup>**

Max Sand Content

## Applications

### Primary Applications

- Well pumping
- River pumping
- Farm irrigation
- Water supply
- Draining flooded areas
- Emptying pools

## Technical Features

Float Switch

Automatic Start/Stop

Automatic Operation

Yes

Design Characteristics

Compact Design, Submersible, Robust Construction, High Capacity

## Operating Conditions

Water Type

Clean water with low sand content
