

Submersible Water Pump with Float Switch

This submersible water pump is designed for efficient drainage and irrigation. It features a float switch for automatic operation based on water level.

Product Overview

High-Efficiency Submersible Water Pump

This submersible water pump is engineered for reliable drainage and irrigation tasks in demanding environments. Featuring an integrated float switch, the unit ensures autonomous operation by automatically starting and stopping based on fluctuating water levels. Its robust construction makes it an ideal solution for basements, ponds, and construction site management.

Technical Specifications

Target Applications

- Basement drainage
- Pond maintenance
- Construction site water removal
- General irrigation

Model Identifier	V250F
Operation	Automatic via float switch

Features

Durability

Heavy-Duty Build • Corrosion Resistant • Submersible Design
