

Submersible Water Pump with Float Switch

This submersible pump is designed for efficient water removal in various applications. Its robust construction ensures durability and reliable performance in demanding environments.

Product Overview

High-Efficiency Submersible Drainage Solution

The SWQX series submersible pump features an integrated float-ball switch for automatic level-based operation, ensuring efficiency and convenience in water management. Designed with internal motor safeguards, it offers automatic protection against overheating and over-current, making it highly reliable in demanding environments. This versatile unit is ideal for water drainage in mining, construction, agriculture, and residential applications.

Technical Specifications

Construction Materials

Component	Material
Pump Body	Cast Iron
Motor Housing	Stainless Steel
Impeller	Cast Iron
Shaft with Rotor	45# Steel
Mechanical Seal	Carbon/Ceramic

Operating Limits

60 °C

Max Liquid Temperature

40 °C

Max Ambient Temperature

Electrical & Protection

- Insulation Class: B
- Protection Rating: IP44
- Continuous Duty Cycle
- Three phase / Single phase options available

Key Features

Safety Certifications

Automatic Overheat Protection • Over-current Safeguard • Float Switch Integrated

Common Applications

Mining, Construction, Agriculture, Cultivation, Residential Gardening
