

Submersible Water Pump with Float Switch

This submersible pump is designed for efficient water removal in various applications. Featuring a float switch for automatic operation, the pump activates when water levels rise and deactivates when levels subside.

Product Overview

Professional Submersible Water Pump

The Q1CP-G submersible pump is engineered for efficient water management in demanding environments. It features a built-in float switch that ensures automatic operation, providing reliable activation and deactivation based on real-time water levels. This durable unit is ideal for draining cellars, pools, and flooded areas, offering both high pumping capacity and user-friendly maintenance.

Technical Specifications

Typical Applications

- Cellar drainage
- Swimming pool water removal
- Flood mitigation

Operation Mode

Automatic, Submersible, Float Switch Controlled
