

Submersible Water Pump with Float Switch

This submersible water pump is designed for drainage and irrigation. It features a stainless steel housing, vertical discharge pipe, and adjustable float switch for automatic operation.

Product Overview

High-Efficiency Submersible Solution

This submersible water pump is engineered for reliable performance in drainage and irrigation applications. Featuring a durable stainless steel housing, it offers excellent corrosion resistance for long-term use in wells, tanks, and flooded areas. The unit includes an integrated adjustable float switch for seamless automatic operation and a robust motor designed for efficiency in confined spaces.

Technical Specifications

Operational Features

- Automatic operation via adjustable float switch
- Vertical discharge configuration
- Includes hose adapter for easy connection
- Base fitted with suction cups for stability

Housing Material	Stainless Steel
-------------------------	-----------------

Applications

Suitable Media

Clean water • Slightly contaminated water

Primary Applications

- Drainage
- Irrigation
- Water extraction from wells/tanks
- Flood water removal
