

Submersible Water Pump with Float Switch

The QDX submersible pump is designed for efficient water removal in various applications. Featuring a durable construction with a stainless steel motor housing and a robust thermoplastic pump body, it ensures reliable performance and longevity.

Product Overview

Versatile Submersible Water Pump

This electric submersible pump is designed for reliable water supply from wells or reservoirs, making it suitable for a wide range of domestic, civil, and industrial applications. Featuring an integrated float switch for automatic operation and a durable motor, it provides efficient performance for garden irrigation and water drainage tasks. The robust design ensures longevity and reliable operation even in demanding environments.

Operating Conditions

Maximum Fluid Temperature	35 C
Maximum Sand Content	0.25 %

Technical Specifications

Motor Type

- Rewindable motor
- Full obturated screen motor

Operating Voltage	220v-240v
Frequency	50 Hz
Certifications & Standards	ISO 9906, CE

Applications

Common Applications

- Well and reservoir water supply
- Domestic use
- Civil and industrial applications
- Garden irrigation
