

Submersible Water Pump with Float Switch

This submersible pump is designed for efficient water removal in various applications. It features a float switch for automatic operation, turning on when water levels rise and shutting off when levels are sufficiently low.

Product Overview

Professional Water Management

The submersible pump is engineered for efficient and reliable water removal across diverse residential and industrial environments. Featuring a robust, durable construction, this unit is designed to withstand immersion for long-lasting performance. It is equipped with an integrated float switch, enabling automated water level management by activating when levels rise and shutting off once drainage is complete.

Technical Specifications

Operation Mode	Automatic with Float Switch
Construction Style	Submersible

Features

Primary Advantages

- Automatic float switch operation
- Submersible design for direct water immersion
- Durable housing for long service life
- Versatile application range

Applications

Common Use Cases	Drainage, Flood Relief, Pool Maintenance, Water Removal
------------------	---
