

Submersible Water Pump with Oxygen and Filtration

This submersible pump combines oxygenation, air supply, and filtration in one device. It is suitable for indoor fountains, decorative waterfalls, desktop ornaments, pools, aquariums, and hydroponic installations.

Product Overview

Versatile 3-in-1 Submersible Pump

This high-performance submersible pump integrates water circulation, oxygenation, and filtration into one compact, reliable unit. Designed for versatility, it provides powerful flow and consistent aeration, making it an excellent choice for indoor fountains, decorative waterfalls, desktop ornaments, and aquarium setups. It is also highly effective for use in hydroponic installations, ensuring optimal water health and movement for your specific requirements.

Ideal Applications

Indoor Fountains, Decorative Waterfalls, Desktop Ornaments, Aquariums, Hydroponic Installations, Pools

Technical Specifications

Model Performance Data

Model	Power (W)	Flow (L/H)	Max Head (M)
