

Submersible Water Removal Pump with Float Switch

This submersible pump is designed for efficient water removal in various applications. Its robust construction ensures durability and reliable performance.

Product Overview

Versatile Water Management Solution

The Q1DP submersible pump is engineered for high-efficiency water removal in both residential and commercial environments. Featuring a built-in float switch, it enables automated operation by activating and deactivating based on real-time water levels. Its compact and robust design makes it a reliable choice for draining basements, sumps, and flood-prone areas with quiet performance.

Technical Specifications

Operation Type	Automatic (Float Switch)
Suitable Applications	Basement Drainage, Sump Pumping, Water Accumulation Removal

Design and Build

Build Quality

Robust Construction • Engineered for Longevity • Quiet Operation

Installation	Compact, suitable for confined spaces
