

Subway Train

This subway train provides a high-capacity solution for urban transit needs. Its multiple carriages facilitate the efficient movement of passengers within a metropolitan rail system.

Overview

Modern Urban Transit Solution

This modern subway train is designed for high-efficiency urban transit, specifically engineered for the Mumbai metro network. Featuring a streamlined aesthetic with a silver exterior and distinctive red accents, it combines contemporary industrial design with robust passenger capacity. Built to meet the demands of high-frequency commuter lines, this rolling stock offers reliability and operational excellence for metropolitan transport authorities.

Technical Details

Design Features
