

Suction Vibrating Destoner TQSX120X2

This suction type gravity stoner uses advanced techniques for efficient stone removal. It is perfect for modern food processing plants.

Product Overview

Professional Grain Separation Solution

The TQSX120X2 is a high-performance suction-type vibrating destoner engineered for the precise separation of stones and heavy impurities from granular materials. By combining a vibrating screen deck with an integrated suction system, this machine effectively lifts lighter materials while ensuring denser contaminants are removed. Designed for demanding applications like grain processing and seed cleaning, it offers robust construction and adjustable parameters for reliable, efficient operation.

Technical Performance

Operational Metrics

120 TQSX

Model Series

Core Features

Vibrating Screen Deck, Suction Airflow Control, Adjustable Vibration Frequency, Heavy Impurity Separation

Design and Utility

Maintenance and Design

- Robust industrial construction
- Easy maintenance access points
- Optimized for granular material processing
- Adjustable settings for separation efficiency
