Overview

High-Efficiency Sugarcane Loader

The YN Series sugarcane loader is engineered for professional agricultural operations, specifically designed for traction, transportation, and loading tasks in sugarcane fields. Built with advanced simulation technology, this machine offers superior strength, reliability, and efficiency to minimize operational costs. It features a robust, reinforced steel frame and a powerful engine to ensure high performance in demanding field conditions.

Performance & Technical

Key Performance Metrics

25 units

Operational Capacity

161 bar

System Pressure

Axle Load Capacity

20 T

Engine Type

Cummins

Features & Options

Optional Equipment

- Grab bucket attachment (1000 USD)

Construction Features

Reinforced steel frame, High-efficiency transmission, Heavy-duty tires, Hydraulic arm

Service & Warranty

Warranty Terms

One year global warranty

Support Services

- Free installation and operation training
- Spare parts availability
- 24-hour technical assistance
