Product Overview

Professional Sugarcane Loading Solution

The YN Series sugarcane loaders are engineered for high-efficiency traction, transportation, and loading operations in sugarcane fields. Developed using advanced virtual simulation and 3D modeling, these units deliver superior strength and reliability. Featuring a powerful engine and reinforced chassis, they are designed to reduce labor costs while maximizing productivity in demanding agricultural environments.

Technical Specifications

Available Attachments

- Hydraulic Grab Bucket

Front and Rear Axle Load Capacity

20 T

Engine Manufacturer

Cummins

Service & Support

Global Warranty

1 Year

Included Services

Free Installation Training, 24-Hour Technical Assistance, Spare Parts Availability
