

Sun Shade Netting

This sun shade netting is designed to provide protection from direct sunlight. It features a plain weave construction and high-temperature fixing for enhanced durability.

Product Overview

Professional Grade HDPE Sun Shade Netting

This premium HDPE sun shade netting is engineered to provide superior environmental control for agricultural and industrial applications. Utilizing high-temperature fixing and plain weaving, the netting offers consistent protection against intense sunlight, heavy rain, and insect intrusion. It serves as an essential solution for maintaining optimal temperature and moisture levels within greenhouses throughout both summer and winter seasons.
